CASE # 2006-00320

Dear Commission,

I received a response from the attorneys of Bluegrass Cellular. Although they say they will not utilize any part of our property. (Does that simply mean use or cut down tree limbs, etc?) We are opposed to their right of way. We feel this would harm our property value.

In regard to the health issues of a cell facility. They sent me their studies from 10 years ago. I'm sure different studies will differ. To me its disturbing that some studies show there are harmful effects.

Also in their literature there were issues of white lights in neighborhoods. I don't know how bright these lights are. It just seems to me a neighborhood isn't a good place for a cellular tower & facility.

The area they propose to use is a low flat area. Wouldn't this tower be more beneficial to them & everyone on a hill or mountain. There are plenty of these around this area of Wayne County.

Sincerely,

Dallas & Connie Percy
